The First Chapter

Kentucky Couples Navigate Their First Year of Marriage

Man Up

As the groom, do you secretly feel melancholy for being in the passenger seat of all the pomp and circumstance while your budding bride-to-be sits behind the wheel?

Do you want your own personal planner with “For the Groom” plastered on the front? Maybe a Gushing Groom mug next to her Blushing Bride cup?

We know, you need some pampering, too, so we’ve rounded up several items that give you your time in the spotlight.

Let's start with your wedding day get-up. This Kentucky tie from Why Louisville (a brick and mortar on Bardstown Road, or online at WhyLouisville.com) will let you “tie one on” without the residual hangover. Hand-printed in white ink on navy blue, you can show your home state some love without looking like a fanatic.

Yes, it will be tempting to put your elbows on the table to show off these Kentucky-flavored cuff links from White Horse Gallery (WhiteHorseJewelry.com) in Paris – but don't. Handcrafted by the gallery's own Richard Roney-Dougal, the horse heads are 18K gold with sterling silver, and come in a variety of styles.

Now, let's say your tie comes undone and your cuff links pop off. Followed by scuffed up shoes and a serious case of the butterflies. No worries – the Mojuba Wedding emergency kit (MyMojuba.com) for grooms comes to the rescue. It's like a medicine cabinet stuffed into a cool messenger bag. We're talking lint brushes, pre-threaded needles, even a complete shaving kit. Plus, it has places to stash your cell phone and your mp3 player ... which we all know has Billy Idol's “White Wedding” on there, so don't try to hide it. ^{KB}
